PROGRESS IN LIPID RESEARCH

An International Journal

Founding Editor: **RALPH T HOLMAN,** *Hormel Institute of the University of Minnesota, 801 16th Avenue NE, Austin, MN 55912, USA*
Executive Editors: **JOHN L HARWOOD,** *Department of Biochemistry, University College, Cardiff, Wales CG1 1XL, UK* and **HOWARD SPRECHER,** *Department of Physiological Chemistry, Ohio State University, Columbus, OH 43210, USA*

Each volume contains critical up-to-date surveys of special branches of this subject so as to cover -- in the course of several years -- all major developments in the field. It includes topics on analysis, properties, chemistry, metabolism, medicine, nutrition, molecular biology, food science and technology related to lipid chemistry.

BIOCHEMICAL SYSTEMATICS AND ECOLOGY

Executive Editors: **MICK RICHARDSON**, *Missouri Botanical Garden, PO Box 229, St. Louis, MO 63166-0299, USA,* **ERNST SCHOFFENIELS,** *Laboratoire de Biochimie, Université de Liège, place Delcour 17, 4020 Liège, Belgium* and **PETER WATERMAN,** *Phytochemistry Research Laboratories, Department of Pharmacy, University of Strathclyde, 204 George Street, Glasgow G1 1XW, UK*

Biochemical Systematics and Ecology is devoted to the publication of original articles and occasional invited reviews on the application of biochemistry and chemistry to systematic problems in biology.
All classes of organisms susceptible to chemical or biochemical study are covered, from bacteria to higher plants and animals including fossil forms.
Any type of chemical or biochemical information may be used in demonstrating their phyletic or other interrelationships, including the elucidation of biosynthetic pathways, feedback control, hybridization and other techniques of molecular biology and the distribution of discrete chemical compounds.
Systematics is interpreted in the widest sense to include studies on variation in populations, classification of living organisms, interspecific relationships and phylogenetic affinities of major taxa.
